

## **Proceedings of the 3rd International Nutrigenomics Conference “from nutrigenomics to personalised nutrition” papers presented by speakers in the following sessions**

© Springer-Verlag and NuGO 2007

- Accessible nutrigenomics science for stakeholders: what’s it all about?
- Optimising nutrition using nutrigenomics: single nucleotide polymorphisms (SNPs) and the diet
- Smarter nutrition: the food industry and nutrigenomics
- Single nucleotide polymorphisms: what can we do with this information?
- Food and metabolic imprinting genes, food, physiology and health
- Nutritional genomics
- Ethical aspects
- Genes, diets and cancer
- Global approaches to the personalised nutrition challenge
- The pathway to personalised nutrition

Round table discussion with stakeholders
